3. Pop up the upgrade menu to upgrade

Precautions:

1. The effective communication distance of speaker microphones is less than 10 meters. Use beyond the range will cause the speaker microphone to transmit and receive abnormally.

2. After the wireless microphone is turned on, it will automatically search for the last paired radio. When the paired radio fails to connect, the wireless mic -rophone will automatically turn of f after 3 Minutes to save power. If the connection is normal, it will prompt that it is connected and can be used. During use, the paired radio goes offline, and the speaker microphone prompts that the connection has been disconnected.

3. When the speaker microphone prompts that the battery is low, please charge the speaker microphone in time. Continued use will cause the speaker mic -rophone voltage to be lower than the protection value and shut down. While charging, the indicator light shows red and turns blue when fully charged.
